

REMARKS

The Official Action of 27 March 2008 has been carefully considered and reconsideration of the application as amended is respectfully requested.

Applicants submit herewith the BP/4 forms requested by the Examiner at page 2 of the Official Action. Applicants also submit herewith a substitute specification, including a revised Sequence Listing, to remove the bases for the objections appearing at pages 2 and 3 of the Official Action.

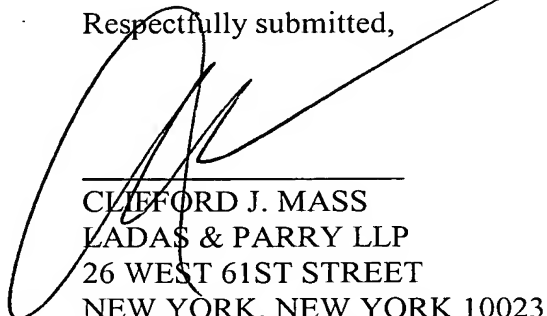

The revision to the Sequence Listing includes a revision to certain of the sequences to correct errors in the Sequence Listing and thereby to assure consistency between the sequences in the Sequence Listing and those in the application as filed. Specifically, the following changes have been made: (a) the peptide sequence of the modified staphylokinas SAK-2 peptide of SEQ ID NO: 3 has been replaced with the sequence described in Fig. 11 of the drawings, and (b) the nucleotide sequence of the modified staphylokinas SAK-2 gene of SEQ ID NO: 2 has been revised to change the nucleotides at positions 16-18 and 22-24 (following the start signal “atg” at position 13-15) to “gcn” such that they encode Alanine-Glycine-Alanine (AGA) rather than Lysine-Glycine-Lysine (KGK), as described in Fig. 11. (Note: As would be clear to one of skill in the art, the Alanine of the modified SAK-2 peptide are encoded by one of gct, gcc, gca or gcg.) Neither of these changes introduces new matter into the application since both the errors and the corrections would have been obvious to those of skill in the art. See MPEP 2163.07(II) (“An amendment to correct an obvious error does not constitute new matter where one skilled in the art would not only recognize

the existence of error in the specification, but also the appropriate correction.”).

Claim 2 has now been amended to recite that the claimed recombinant nucleotide sequence encodes the staphylokinase SAK-2 protein of SEQ ID NO: 3, and this amendment is respectfully believed to remove the basis for the rejection to claim 2 under 35 USC 112, first paragraph appearing at pages 3-5 of the Official Action. The amendments to the Sequence Listing are respectfully believed to remove the basis for the rejection under 35 USC 112, first paragraph to claims 5, 6, 8, 9 and 26-7. Specifically, the inconsistencies noted by the Examiner at pages 3-5 of the Official Action have been clarified by amendment. Moreover, one of skill in the art would readily appreciate from the specification as filed that Applicants were in possession of the subject matter now claimed as of the application filing date.

In view of the above, Applicants respectfully submit that all rejections and objections of record have been overcome and that the application is now in allowable form. An early notice of allowance is earnestly solicited and is believed to be fully warranted.

Respectfully submitted,

CLIFFORD J. MASS
